DETAILED ACTION

1. Claims 1-24 are presented for examination.
2. The abstract of the disclosure is objected to because the title should be deleted on top of the page. Correction is required. See MPEP § 608.01(b).

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-3, 5-15 and 17-23 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-4 of U.S. Patent No. US006677938B1.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the above-mentioned patent are broader than that of the application.

Therefore, it would have been obvious to one of ordinary skill in the art to modify/replace the limitations of the issued patent by using creating a database instead of using generating in real time a database and viewing said database by accessing said database, this modification would have integrated the necessary and acceptable language into the (PRI) technology, thereby improving the efficiency and the reliability of the navigation system as a whole.

Allowable Subject Matter

5. Claims 4, 16 and 24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record fail to teach or fairly suggest with respect to claim 4, selecting a laser-diode-based optical scanning system if a range between a PRS and a real site object comprises a short range distance; with respect to claim 16, a laser-diode-based optical scanning system configured to measure a short range distance between said PRS system and a real site object; and with respect to claim 24, an apparatus for navigating a vehicle around a real site, wherein said positioning system is selected from the group consisting of: {a Satellite Positioning System (SATPS); a GALILEO system; a GPS system; a differential DGPS system; a real time kinematic RTK GPS system; a combined GLONASS/GPS system; a combined GALILEO/GPS

system; an inertial navigation system (INS); and a pseudolite navigation system}.in combination with the other elements and features of the claimed invention.
